ABSTRACT

A document creation support system having: an input
interface unit for inputting information (parameter
information) of a description change part in accordance with
5   specifications by a designer; a variable converting unit for
generating a variable from the information input to the input
interface unit; an entity referring unit for defining the
variable generated by the variable converting unit; a database
unit; a synthesizing unit for referring to a character train
10   in a template database part, referring to a variable-content
database part in the database unit on the basis of the definition
of the entity referring unit and performing synthesis, and a
function of outputting a manual by the synthesizing unit.
